...to a whole new world*

## YOUR LASIK EVALUATION WITH SHROFF EYE

### Thank you for visiting us

The primary objective of this consultation is to determine that whether you are a candidate for laser vision correction (LASIK), and if so, which procedure is most appropriate for you.

### PREREQUISITES FOR YOUR LASIK EVALUATION

Prior to your visit to us what we need from you is:

1. No contact lens wear for 3- 5 days [soft CL] and 3 weeks if semi soft.
2. Since we dilate the pupils, we request you to have someone accompanying you to drive you back as you will not be able to self-drive. This is because the vision is slightly fuzzy for an hour or two. Hence avoid going back to office work after the evaluation is completed.

### THE EVALUATION PROCESS

1. The **Front Desk Receptionist** will hand you an Outpatient sheet to be filled for your medical record. Kindly complete all applicable spaces.
2. Your initial consultation with our **Optometrist** includes:
  - A complete health and eye history
  - A measurement of your visual acuity checking your current method of vision correction (glasses)
  - Measurement of your spectacle prescription (refraction)
  - Eye Pressure Check
3. Your next examination with our **LASIK specialist, Dr Anand Shroff** includes:
  - Assessment of your needs, motivation and expectations for LASIK / Laser Vision Correction
  - Fine measurement of your prescription (refraction)
  - Size and reaction of your pupils
  - A digital mapping with the Oculyzer for the shape of your cornea: Topography maps and measurement of the thickness of your cornea: (Pachymetry)
4. Your eyes will be dilated by the **nurse**. You are asked to keep your eyes closed for a brief period of time to aid the dilation (time required for pupil dilation varies, the nurse checks if you are ready)
5. Further **LASIK specific tests** will be performed by **Dr Anand Shroff**
  - Wavefront Analysis
  - Microscopic evaluation of the health and integrity of the front of your eye, the cornea
  - Evaluation of Your Tear Film for Dry Eyes
  - Assessment of the health of the retina and optic nerve
  - Any other test the doctor finds necessary
  - Consultation and discussion about your treatment options after you are declared eligible for the procedure

6. Your Treatment Fee Structure and Payment procedure will be explained to you

7. Our **Front Desk Receptionist** will help you fix the appointment for the LASIK procedure and complete the billing formalities of the day's evaluation

### Customization

**With our technology we offer 3 types of customized treatments based on the person's needs, eye conditions, spectacle numbers and even age requirements to give a precise result.**

### Versatile Range of Treatments

We have treated spherical numbers as high as -12 D and + 6 D as well as astigmatism as high as  $\pm 6$  D with excellent results. The extent to which an eye can be corrected is determined by our doctor after the LASIK evaluation.
