

Shroff eye®

NEWS AND VIEWS

Shroff Eye – receives 3rd accreditation from Joint Commission International, JCI, USA in 2012.

**Vision
Therapy
Clinic launched
at Shroff Eye
Hospital!**

What is Vision Therapy?

- Is a non-surgical and customized vision training program designed to correct certain vision problems and improve visual skills.
- It involves a series of procedures carried out by a specially-trained optometrist (orthoptist).
- It aims to "teach" the visual system to correct itself.
- It is like physical therapy for the eyes and the parts of the brain that control vision.

Did You Know?

You
blink LESS
when
you're reading,
which is why your eyes
get tired quickly.

You
blink MORE
when
you're talking.

On average,
you blink **17 times** per **minute**,
14,280 times in a **14 hour day** and **5.2 million times** a **year**.

Real stories. Real people.

I was delighted with the service, care and high quality of Doctor Anand's eye surgery and clinic. The staff were professional, courteous and responsive.

I flew down from London to do the surgery. I was worried about the after-care since I was based so many miles away in London.

The whole experience was life-changing. I can see perfectly without glasses (touch wood) after 36 years of wearing glasses. It has been an amazing and the best experience with the doctors who were always patient and reassuring and answered my every query and allayed all doubts before, during and after the procedure.

– LASIK patient
