## US FDA approved Contoura™ Vision-Topography-guided LASIK

The First Personalized LASIK Procedure now available at Shroff Eye

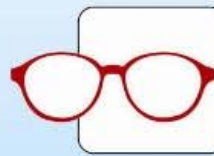

Only a **small number of eye surgeons in the world** have the opportunity to perform this LASIK procedure

The **first major advancement** in LASIK technology in the last 10 years

Offers **improved night vision** and the most **accurate LASIK results**.

**Diagnoses imperfections** in both the curvature and the optics of the cornea

Combines these measurements with the patient's eyeglass prescription to **optimize the focusing surface**

Creates a highly **personalized treatment plan**.

- Are you in the age group of 18- 40 years?
- Do you have spectacle powers under – 14 diopters of myopia?
- Is your astigmatism (cylindrical power) under 7 diopters?
- Do you wish to remove dependency on spectacles / contact lenses?

If your answer is "yes" to the above, then YOU are a candidate for **Contoura™ Vision-Topography-guided LASIK**

# Do you want to improve your performance in target sports?\*

\*Such as tennis, squash, shooting, archery, cricket, and football

## Determine your Eye Dominance to improve on your target sports technique!

Eye dominance is a tendency to prefer visual input from one eye more than the other. There is a very simple test to determine which of your eyes are dominant:

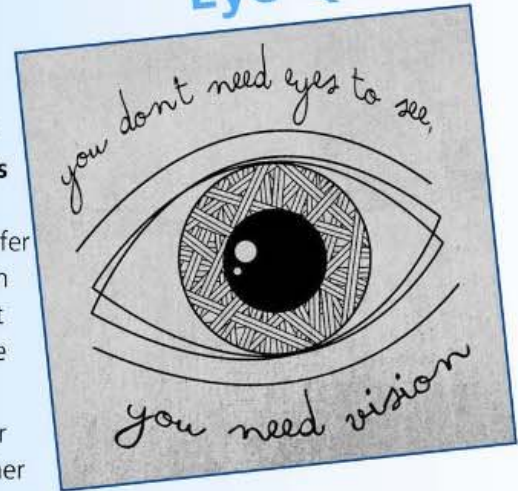

1. Extend both arms in front of your body and place the hands together so as to make a small triangle

between your thumbs and the first knuckle (see image).

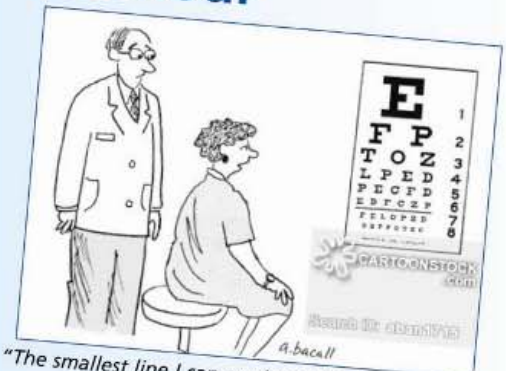

2. With both of your eyes open, look through the triangle and focus on a specific small object.
3. Close your left eye.
4. If the object remains in view, you are right eye dominant. If your hands appear to move off the object and move to the left, then you are left eye dominant.

Being left or right eye dominant is like left and right handedness, though the side of the dominant eye and the dominant hand do not always match. Right eye dominant people should take part in all shooting sports as right-handed participants, and vice versa.

## Eye Quote

## Humour

"The smallest line I can read says 'Made in China'."

## Real Stories. Real People.

I'm an American entrepreneur who was in Mumbai for business. I have wanted to undergo LASIK surgery for years, but didn't want to spend \$ 5000 USD. Instead I got a top notch eye doctor in Mumbai (Dr. Shroff) at a fraction of the cost. The surgery went superb, and so did the recovery. Couldn't be happier. Great staff that are attuned to medical tourism and the questions you have as a foreigner getting a health procedure. They all went above and beyond my expectations. Phenomenal experience. Five out of five stars.
