Avoid Glare and Intolerance To Sunlight after Cataract Surgery... while also Protecting your Retina!

Introducing…
The MATRIX AURiUM® Intra Ocular Lens (IOL) USA (FDA approved)

A unique affordable intraocular lens (IOL) for Cataract Surgery with dual advantage!
The Smart Photochromic IOL is made of a material that is perfectly colourless when the patient is indoors. Upon exposure to bright light, it blocks UV and invisible deep Blue-deep Violet Light which harm the retina.

Advantages over other Monofocal lenses:

- Protects the Retina
- Cuts glare, reduces eyestrain and intolerance to light
- Comfortable vision without squinting
- Improves night vision after cataract surgery
- Superior colour perception
- Latest lens design

Shroff Eye Opener® # 32
DO NOT wait for your cataract to mature. Visit your eye doctor in the early stage of cataract, as new advanced treatment will work better.

Real Stories. Real People.

“My eyes are in good health. I have just returned from a holiday and it didn’t affect my eyes at all. Dr Shroff was great and I have been recommending him to everyone! :) I was completely put at ease by him and he was very open and honest about all the pros and cons of the various procedures and also about the cost.

I trusted him because I felt like he was thinking about me and my eyes and putting all the cards clearly on the table. I also appreciate, since I live abroad, that all the costs were sent to me prior to my arriving and I was able to make a confirmed appointment well in advance. It made me feel like I would not be fleeced because I was not living in the country and it reinforced my faith that everything was above the table and enabled me to plan my trip accordingly”

– A cataract patient

“I don’t have enough words to thank you doctor, for the wonderful job you have done for the Cataract Operation on my right eye.

Now everything is better and brighter for me to see Gods wonderful creation. Thank you for taking care of my welfare.”

– A cataract patient
